

Meeting #1 (2013-09-12)

**This is the first meeting*

1. What has been done since last meeting?

Adam has planned the project with the rest of the group and researched about UI guidelines on developer.android.com.

Anno has planned the project with the rest of the group, configured developer tools and done some tutorials about databases (SQLite).

Carl has planned the project with the rest of the group and configured developer tools.

Erik has planned the project with the rest of the group and reflected on ideas for the project.

Johanna has planned the project with the rest of the group, configured developer tools and done some tutorials on developer.android.com.

Simon has planned the project with the rest of the group, created a git repository and some documentation for scrum tasks and epics.

2. What should be done until next meeting?

Adam will do Android tutorials, discuss the index menu and search for information about the meaning of being a “scrum master”.

Anno will research more about databases and maybe start developing a database handler.

Carl will do Android tutorials with Simon and Erik.

Erik will will do Android tutorials with Carl and Simon

Johanna will do some research on databases, continue with Android tutorials and maybe start developing a database handler.

Simon will do Android tutorials on navigation drawers, prepare developer tools etc.

3. Any problems encountered that might prevent our workflow?

Adam: None.

Anno: None.

Carl: None.

Erik: None.

Johanna: None.

Simon: None.

4. Other topics discussed

- Adam is now the “scrum master” of the project.
- Erik is now the “product owner” of the project.
- The language in the app’s interface should mainly be English. Swedish might be added later on.
