

# Meeting #12 (2013-10-04)

## 1. What has been done since last meeting?

**Adam has** continued to look into implementing notifications in the productivity clock.

**Anno has** worked on making the auto generating schedule complete.

**Carl has** Worked on making gui for picking categories to display

**Erik has** been working on editing a task. He also improved some visual features concerning editing/adding a task. Some are still broken though.

**Johanna has**

**Simon has** begun implementing GPS reminders, using geofences.

## 2. What should be done until next meeting?

**Adam will** hopefully have implemented notifications into the productivity clock.

**Anno will** have completed the autogeneration.

**Carl will** Continue working on gui for picking categories to display and then proceed to actually making it possible to pick categories.

**Erik will** try to make everything from an old task be editable and shown correctly in the “edit”-view. He will also fix the broken parts of the GUI, though it’s not very highly prioritized at the moment as it is still functional.

**Johanna will**

**Simon will** continue working on the GPS reminders / geofencing.

## 3. Any problems encountered that might prevent our workflow?

Adam: Implementing notifications for the productivity clock turned out to be harder than expected, but will hopefully be fixed for this week’s release.

Anno:

Carl: Same as Erik...

Erik: Implementation looks easy. You spend hours trying to get it done. Then you solve it by a few lines of code. Erik is not smart enough.

Johanna:

Simon:
