

Meeting #5 (2013-09-19)

1. What has been done since last meeting?

Adam has done more tutorials and some coding for the navigation drawer.

Anno has continued with developing the database. The methods for creating a database is now done.

Carl has been trying to find a good solution for a multilevel expandable list view.

Erik has been trying to create a multilevel expandable list view.

Johanna has continued with developing the database. The methods for creating a database is now done.

Simon has continued with implementing the basic UI.

2. What should be done until next meeting?

Adam will continue developing the navigation drawer and the overall basic UI of the application. Might merge with the expandable list fragment. Is also going to implement a view and an activity for adding a new task.

Anno will continue working on the database and write tests for it. Is going to create methods for reading and deleting items in the database, and methods for updating it.

Carl will try to implement the multi level expandable list with a new approach.

Erik Will help Carl implement his ideas and look on the next level of implementation

Johanna will continue working on the database and write tests for it. Is going to create methods for reading and deleting items in the database, and methods for updating it.

Simon will continue developing the navigation drawer and the overall basic UI of the application. Might merge with the expandable list fragment. Is also going to implement a view and an activity for adding a new task.

3. Any problems encountered that might prevent our workflow?

Adam: Lacking some basic knowledge in Android, will try to keep up and do more tutorials.

Anno: None.

Carl: Lacking some basic knowledge in Android, will try to keep up and do more tutorials.

Erik: Implementation of the multilevel expandable list view turned out to be much more complex than expected.

Johanna: None.

Simon: None.

4. Other topics discussed
