

# Meeting #8 (2013-09-26)

## 1. What has been done since last meeting?

**Adam has** done some tutorials, and begun researching about notifications in Android.

**Anno has** looked at the other's code and tried to understand it, and implemented an editbutton that gets visible when longpressing a list object.

**Carl has** fixed how lists are updated

**Erik has** worked on the add menu

**Johanna has** looked at the other's code and tried to understand it, and implemented an editbutton that gets visible when longpressing a list object.

**Simon has** created some tests for MainActivity and TabsPagerAdapter, researched about notifications in Android.

## 2. What should be done until next meeting?

**Adam will** start implementing the pomodoro (productivity watch) on his own.

**Anno will** continue with implementing the edit mode of a task.

**Carl will** restructure the lists and adapters by removing static references and making them testable

**Erik will** continue to work on the add menu

**Johanna will** continue with implementing the edit mode of a task.

**Simon will** continue researching about and implementing the notification handler of the application.

## 3. Any problems encountered that might prevent our workflow?

Adam:

Anno:

Carl:

Erik:

Johanna:

Simon:

#### **4. Other topics discussed**
