

1. What has been done?
 - a. It's now possible to add a new task with a custom title, description etc.
 - b. There is now a customized database that handles the application's data.
 - i. Supports some of the future features, maybe not all.
 - c. A navigation tab has been implemented.
 - d. Tasks are displayed in an expandable list.
 - e. The actionbar behaves according to the guidelines, with home/up button and a dynamic title.

2. Is there any goals that hasn't been reached, and if so, why?
 - a. It is currently not possible to edit or remove tasks
 - b. Tasks still need to be sorted to the correct day in the list
 - c. It's not possible to add a reminder to a task
 - d. Write tests for the database such that all the methods are tested

(All of the above unreached goals are due to lack of time)

3. Are there any actions that are necessary to prevent future discrepancies?
 - a. Attempt to make a more realistic sprint backlog.
