

# Meeting #18 (2013-10-18)

## 1. What has been done since last meeting?

**Adam has** created a service for the productivity clock with limited functionality. It is now possible to start the service and send data to it.

**Anno has** worked on the gui for seeing what blocks are in the database.

**Carl has** worked on fixing small things and code quality.

**Erik has**

**Johanna has**

**Simon has** continued working on the bugs from the “known issues” list.

## 2. What should be done until next meeting?

**Adam will** complete the productivity clock service.

**Anno will** add some more functionality for the block view, then move on to refactoring, testing and commenting.

**Carl will** continue with small fixes and code quality. When he cant find more obvious things to do he will move on to testing.

**Erik will**

**Johanna will**

**Simon will** remove the “done” button in notifications for event, fix some small bugs and try to make the date and time spinners for an event synced.

## 3. Any problems encountered that might prevent our workflow?

Adam: Because of limited previous programming knowledge, implementing the service for the productivity clock has taken longer than expected.

Anno:

Carl:

Erik:

Johanna:

Simon: None.

#### **4. Other topics discussed**
