

Meeting #10 (2013-10-01)

1. What has been done since last meeting?

Adam has created two timers for the pomodoro view (one 25min, one 5min).

Anno has not begun implementing anything yet, due to lack of time.

Carl has worked on getting all data saved to the database when creating new activity/task.

Erik has continued constructing the GUI for adding a new task, and is now done.

Johanna has not begun implementing anything yet, due to lack of time.

Simon has made the code for building notifications more general and created basic action buttons for the notifications (mark task/event as done, snooze reminder one hour).

2. What should be done until next meeting?

Adam will try to make the pomodoro fragment remember the time even if it's not visible.

Anno will begin implementing the "autogenerator" for generating weekly schedules.

Carl will continue working on getting all data saved to the database when creating new activity/task.

Erik will try to make the date and time spinners in the new task view look prettier.

Johanna will begin implementing the "autogenerator" for generating weekly schedules.

Simon will start implementing date and time pickers for the new task view.

3. Any problems encountered that might prevent our workflow?

Adam: None.

Anno: None.

Carl: None.

Erik: None.

Johanna: None.

Simon: None.

4. Other topics discussed
