Meeting #9 (2013-09-27)

1. What has been done since last meeting?

Adam has created a fragment for the pomodoro/productivity clock with a basic UI containing a start button and a countdown timer.

Anno has continued implementing the edit mode that's activated when longpressing on a task.

Carl has continued working on getting the event list sorted after time.

Erik has continued working on the UI for adding a new task.

Johanna has continued implementing the edit mode that's activated when longpressing on a task.

Simon has implemented a notification handler and an alarm receiver that can send notifications to the Android System at a specific time (with hardcoded title and description).

2. What should be done until next meeting?

Adam will continue implementing the pomodoro/productivity clock.

Anno will continue implementing the edit mode.

Carl will continue implementing the sorting method for the event list and, if time, create some tests for some of the already existing classes.

Erik will continue working with the UI for adding a new task.

Johanna will continue implementing the edit mode.

Simon will continue implementing the notification handler so that it can create a custom notification from a list object, and make the notifications more good-looking in general.

3. Any problems encountered that might prevent our workflow?

Adam: None.

Anno: Might not be able to reach goal, due to lack of time.

Carl: None.

Erik: None.

Johanna: Might not be able to reach goal, due to lack of time.

Simon: Might not be able to reach goal, due to lack of time.

4. Other topics discussed
