Meeting #6 (2013-09-20)

1. What has been done since last meeting?

Adam has implemented an activity for adding new task, and connected it to the database (only possible to add a task with title, description and "important mark").

Anno has been working on a solution for the database and is almost completed.

Carl has found a good solution for listing to do events

Erik has been working with Carl to implement the list.

Johanna has been working on the database.

Simon has implemented an activity for adding new task, and connected it to the database (only possible to add a task with title, description and "important mark").

2. What should be done until next meeting?

Adam will continue developing the UI for adding a new task (make it possible to attach time, fake reminders etc).

Anno will finish the database to be ready for the integration of the first release.

Carl will Look at editing and removing to do events. And sorting them into the right expandable list

Erik will try to achieve a better "look and feel" of the list as well as looking into editing and removing items.

Johanna will work with Anno to finish the database.

Simon will continue developing the UI for adding a new task (make it possible to attach time, fake reminders etc).

3. Any problems encountered that might prevent our workflow?
Adam: None.

Anno: None
Carl: Support libraries might be causing conflicts preventing compilation
Erik: None
Johanna: None
Simon: None.

4. Other topics discussed
- V0.1 is now uploaded to the master branch
