Meeting #16 (2013-10-15)

1. What has been done since last meeting?

Adam has continued to learn about android services. Starting to get the hang of it now.

Anno has worked on applying autogeneration getting it working with the GUI

Carl has made picking what categories to display possible. As soon as categories have been implemented in add new task (and they are saved into database) it will most likely simply work.

Erik has been working on the presentation of a listobject in the different lists.

Johanna has

Simon has fine tuned some code, cleaned up.

2. What should be done until next meeting?

Adam will start developing the productivity clock service.

Anno will finish what he started. Autogeneration for all!

Carl will fix it so hidden categories are removed and not simply set to invisible.

Erik will continue working on making certain elements of the app more visually appealing.

Johanna will

Simon will look into a bug that causes the app to crash when clicking "Done" or "Snooze" in a notification whille the app isn't running in background.

3. Any problems encountered that might prevent our workflow?
Adam: Lack of android programming knowledge means learning has taken longer than expected.
Anno: Kind of, not many hours available to work with.
Carl:

Erik:
Johanna:
Simon: None.

4. Other topics discussed
